Lock House 16 on the D&H Canal, Glen Eyre, PA

West Abutment of Roebling Aqueduct over the Lackawaxen River. This was a two-span suspension aqueduct, with a central pier and a double towing path, that was built by J. A. Roebling as part of the 1848 enlargement of the D&H Canal. This aqueduct, which opened in the spring of 1849, was 228 feet long. Its two cables were 7 inches in diameter and each contained 1,624 wires.
